

A Company with a Long Tradition

Steeped in heritage and tradition, Röwer & Rüb looks back on a long company history. Heinrich Röwer founded a blacksmith's shop for shoeing and wagon construction in 1867 which developed into one of the largest plough manufacturers in Germany. In 1978, Röwer & Rüb GmbH began specializing in the construction and manufacture of stabling. The company moved to a new larger site in Thedinghausen in 2003.

Competent Service

For more than 30 years, Röwer & Rüb have concentrated on the manufacturing of high quality equestrian sport systems. All products of Röwer & Rüb fulfill the visual, functional, and safety-relevant requirements of our discerning customers while at the same time satisfying the requirements of appropriate and modern horse-keeping. Customized consulting

Customers from all over the world appreciate not only the quality of our products but also the quality of our consulting service. Our highly qualified team ensures the professional implementation and realization of your planning requests. Our competent consultants will be of service to you during each stage of your project. You will not only profit from their many years of experience for a new construction but also for the renovation of an existing facility.

Technical information of the loose horse boxes

All steel sections including those which are powder-coated, are hot-dip galvanized according to DIN and at the same time treated with an organic coating. For infill you may choose between hardwood timber and bamboo, however, other materials are available on request. Invisibly welded grills and the welded frame mode of construction add maximum stability to the stalls. Technical finesse for the daily comfort of man and animal. Frontages are available up to a height of 2.30 m, the hardwood's height amounts to 1.30 m. Röwer & Rüb is developing, producing and selling top quality products all over the world
